DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Course: CSE 391
Name: Shaekh Ahmad Shakib
ID: 22101125
Email: shaekh.ahmad.shakib@g.bracu.ac.bd

Project Title: Restaurant Management App (TableEase)

Project Features:
By the end of this course, implemented features:

a) Order Creation — Staff can create customer orders for table service, cashier, or drive-thru.

b) Order Status Tracking — Each order can move through stages like pending, preparing, ready, and completed.

c) Menu Management — Admin can add, edit, delete, and organize food and drink items.

d) Billing System — The system automatically calculates the total bill for each order.

e) Payment Recording — Staff can record whether the customer paid by cash, card, or mobile wallet.

f) Role-Based Dashboard — Different staff members see different pages based on their role.

g) Task Assignment — Admin can assign daily work tasks to employees and track them.

h) Sales Report Dashboard — Management can view daily revenue, expenses, and profit in one place.
